

Examination Table Medistar BX2

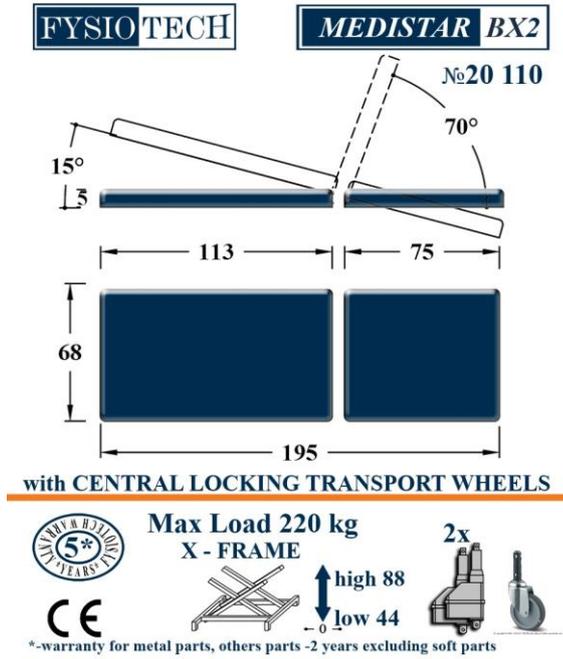

The **Medistar BX2** is an electric examination table featuring a two-section design with adjustable angles, allowing for versatile patient positioning. It is equipped with a range of comfort-enhancing features to support general examinations. The table also includes a Trendelenburg positioning function, assisted by gas spring mechanisms, for added flexibility. For safety and ease of use, the treatment table is fitted with a central brake system and an antistatic swivel castor. Additionally, customised dimensions can be provided upon special request.

Standard features

- Electrical height adjustment 44-88cm (max load 220kg)
