

The future in focus since 1840

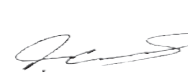

The simple, yet vital, daily routine of patient measuring and weighing is performed in every clinical setting, with weight and height measurements remaining as essential cornerstones of clinical care. Our corporate vision is to provide even more necessary vital parameters from a single source – with solutions as trustworthy as our tradition in medical measuring systems and scales.

This catalog reinforces our vision in providing a comprehensive product portfolio. In addition to our established scale selection, you will find bioimpedance solutions that have been rigorously tested by medical validation studies, unmatched, certified EMR integration solutions and enhanced vital signs monitors to streamline your workflow. At the same time, seca is committed to continuous software development to bring the perfect product today, tomorrow and in the future.

Let yourself be inspired by our innovations and discover the best-suited solution for your clinical needs today.

Contents

The perfect solutions for medical measuring and weighing – from premature infants to immobile patients.

- 8 Baby scales
- 16 Pediatric measuring systems
- 22 Measuring stations
- 28 Column scales
- 34 Flat scales
- 40 Height measuring systems
- 48 Handrail scales
- 54 Wheelchair scales
- 60 Chair scales
- 64 Specialized scales

Not all products, accessory parts, functions or services are available in all countries.

See more than just weight and height – the validated BIA solution for medical use.

- 68 Medical Body Composition Analyzers
- 74 Software for Medical Body Composition Analyzers

Simply and routinely monitor vital signs with the seca EMR-validated spot-check monitor.

- 78 Medical Vital Signs Analyzer

Ready for the hospital of the future – all measured data is instantly available in the electronic medical record.

- 84 Integration solutions

Maintenance, spare parts, software support: pre- and post-sales service from seca ensures your hospital or practice run smoothly.

WEIGHT HEIGHT CIRCUMFERENCE

The perfect solutions for medical measuring and weighing – from premature infants to immobile patients.

Measuring and weighing are among the thousands of routine procedures in a hospital, doctor's office and every medical facility. In all our measuring and weighing solutions, we aim to make this routine procedure as simple and efficient as possible. We provide solutions for patients of all ages, states of health and mobility levels. Absolute precision, reliability and longevity form the foundation for every seca product. What's more, our measuring systems and scales provide an abundance of functions and details that make work easier for staff and help to prevent mistakes.

Baby scales

Babies who feel safe and secure are easier to weigh.

Baby scales by seca make weighing fast and comfortable, thanks to the skin-friendly materials that immediately take on and radiate body warmth. With designs that make the baby feel safe and advanced functions that shorten the weighing process, such as seca integration solutions. They allow you to transmit measurements quickly, securely and wirelessly to any EMR (Electronic Medical Record) system.

EMR

seca 757

EMR-validated baby scale with very precise graduation

- + Utmost accuracy: suitable for premature infants
- + Weighing tray made of heat-retaining plastic
- + Backlit, easy-to-read LCD display
- + Included rechargeable batteries allow mobile use without searching for a power outlet
- + Three-stage adjustable damping for fast weighing
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

The backlit LCD display ensures results can be easily read, even in dimmed rooms.

Can be operated by rechargeable batteries or power adapter.

Approval class	III
Capacity	15 kg
Graduation	2 g < 5 kg > 5 g
Functions	TARE, HOLD, Auto-HOLD, damping, auto weighing range switch-over, automatic switch-off, SEND
Accessories	+ Interface module seca 452 + Battery for longer mobile use seca 454 + Mobile carts seca 403 and seca 402

Accessories seca 403 / seca 402

Carts for mobile support of seca baby scales

- + Ideal supplement to baby scales seca 757, seca 336 i, seca 336, seca 376 and seca 385 / 384 / 834
- + Optionally available paper roll holder seca 408

Image contains optional digital measuring rod seca 234 and barcode scanner from a third-party supplier

seca 336 i

EMR-validated baby scale with Wi-Fi function

- + Optional with digital measuring rod seca 234 or analog measuring rod seca 232 n
- + Damping system for fast weighing
- + Easy-to-read, backlit LCD display
- + USB port for barcode scanner for user and patient identification
- + EMR-validated via Wi-Fi: transmit measured data directly to any Electronic Medical Record (EMR) system

Barcode scanners can be plugged in directly to the scale's USB port for optional user and patient identification.

Easy-to-read, backlit LCD display. Weight and height are transmitted to the electronic medical record at the touch of a button.

The digital measuring rod simplifies measurement with a clear display and transmission function.

Approval class	III
Capacity	20 kg
Graduation	5 g < 10 kg > 10 g
Functions	TARE, BMIF, HOLD, Auto-HOLD, SEND, damping, automatic switch-off, Wi-Fi, auto weighing range switch-over, confirm button
Ports	USB for barcode scanner
Accessories	+ Mobile carts seca 403 and seca 402 + Digital measuring rod seca 234 + Analog measuring rod seca 232 n + Battery for longer mobile use seca 454 + Carrying case seca 428

Image contains optional analog measuring rod seca 232 n

Image contains optional measuring rod seca 233

seca 336

Electronic baby scale for space-saving use

- + Measuring and weighing can be done in a single step thanks to an optional length measuring rod
- + Flat construction for easy storage in drawers
- + Lightweight with a carrying handle for mobile use
- + Wide range of functions: TARE, BMIF, HOLD, Auto-HOLD and adjustable damping
- + Large backlit LCD display
- + Extendable with digital measuring rod seca 234 or analog measuring rod seca 232 n

The optional measuring rod can be used to determine weight and height simultaneously.

Approval class	III
Capacity	20 kg
Graduation	5 g < 10 kg > 10 g
Functions	TARE, BMIF, HOLD, Auto-HOLD, auto weighing range switch-over, damping, automatic switch-off, confirm button
Accessories	+ Mobile carts seca 403 and seca 402 + Digital measuring rod seca 234 + Analog measuring rod seca 232 n + Carrying case seca 428 + Power adapter 401

seca 376

EMR-validated baby scale with extra large weighing tray

- + Weighing tray with high side walls for increased safety
- + Weighing and measuring in one step thanks to optional length measuring rod
- + Three-step damping for fast weighing
- + Large tray is suitable for weighing toddlers while sitting
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

High sides on weighing tray offer special protection from falling out.

Approval class	III
Capacity	20 kg
Graduation	5 g < 7.5 kg > 10 g
Functions	TARE, BMIF, HOLD, Auto-HOLD, auto weighing range switch-over, damping, automatic switch-off, SEND
Accessories	+ USB adapter seca 456 + Mobile carts seca 403 and seca 402 + Measuring rod seca 233 + Power adapter 447 + Switch-mode power adapter 400

With seca integration solutions and the press of a key, the seca 376 can transmit every measurement to an EMR system.

Power supplied by batteries for mobile use.

seca 385 / seca 384 / seca 834

2-in-1 mobile baby scale and flat scale for toddlers

- + Weigh babies lying down and toddlers standing up
- + Easily detach the weighing tray from the base to use as a flat scale
- + Compact, robust and lightweight: ideal for mobile use
- + High-quality baby scale with calibration approval at an entry-level price
- + Wide range of functions: TARE, HOLD and Breast-Milk-Intake-Function (BMIF)

The weighing tray can be removed quickly and easily at the touch of a button.

	seca 385	seca 384	seca 834
Approval class	III	III	III
Capacity	50 kg	20 kg	20 kg
Graduation	20 g < 20 kg > 50 g	10 g < 10 kg > 20 g	10 g < 10 kg > 20 g
Functions	TARE, BMIF, HOLD, automatic switch-off, weighing range switch-over		
Accessories	+ Mobile carts seca 403 and seca 402 + Measuring board seca 417 or measuring mat seca 210 + Backpack seca 409 (for combination with measuring board or measuring mat) + Carrying case seca 414 (for combination with measuring board) + Backpack seca 431 + Carrying case seca 413		

seca 834 is only available in certain countries.

seca 745

Mechanical baby scale with sliding weights

- + Classic construction with high-quality precision mechanics
- + Exact weight determination using the reset-to-zero function
- + Gently curved weighing tray for the utmost safety when weighing
- + Removable scale cover is easy to clean and perfect for mobile use

The reset-to-zero function guarantees reliable determination of net weight by simply deducting the extra weight of padding or diaper.

Approval class	III
Capacity	16 kg
Graduation	10 g
Functions	Reset-to-zero function

Pediatric measuring systems

Adaptable devices are preferred.

Clinics, medical practices and health care facilities have varied conditions and requirements. seca responds with a wide range of products for pediatrics – from infantometers to a portable measuring mat and from measuring rods to a head circumference measuring tape. seca has the right solution for every application, whether the devices are for in-patient or mobile use, in large or small spaces, for everyday or infrequent use. They all share the renowned seca quality which always lives up to the most demanding medical requirements.

seca 416

Infantometer for measuring babies and toddlers

- + Robust, extra large construction for precise measuring
- + Automatically correct lying position due to trough-shaped measuring surface
- + Measurement scale printed along top side for easy reading
- + Space-saving

The foot positioner locks into place to capture results.

Measuring range	33 – 100 cm
Graduation	1 mm

seca 417

Light, space saving and stable measuring board also ideal for mobile use

- + Simple operation for quick mobile use
- + Folds up for space-saving storage
- + High-quality materials for long service life
- + Smooth surfaces for easy cleaning

The high-quality folding mechanism guarantees a long service life.

The measurement results are easy to read from the large measuring scale.

Measuring range	10 – 100 cm
Graduation	1 mm
Accessories	+ Backpack seca 409 or carrying case seca 414 (for combination with baby scale seca 385 / 384 / 834) + Carrying case seca 412

Possible combination

seca 384 / 385 / 834, seca 417 and seca 414

The mobile measuring and weighing system for babies and toddlers

- + Combined weighing and measuring of babies and toddlers in a lying position
- + The 2-in-1 baby and toddler scale plus measuring board can be easily transported together in a roomy carrying bag

seca 210

Mobile measuring mat for babies and toddlers

- + Light-weight and easy to clean with most commercially available disinfectants
- + Fixed head piece and the sliding foot positioner make it simple to use
- + Measuring mat rolls up for easy transport and space-saving storage

The measuring mat can be rolled up for space-saving storage.

Measuring range	10–99 cm
Graduation	5 mm
Accessories	+ Backpack seca 409 or carrying case seca 414 (for combination with baby scale seca 385 / 384 / 834)

seca 207

Baby measuring rod with large calipers

- + Fixed headpiece and smooth sliding foot positioner
- + Space saving and mobile
- + Attachable to changing tables or for wall mounting
- + Foldable calipers for easy storage

Measuring range	7–99 cm
Graduation	1 mm

Movable calipers at one end of the measuring rod make this instrument suitable for use with both babies and toddlers.

seca 212

Measuring tape for head circumference of babies and toddlers

- + Hygienic, disposable measuring tape of non-stretch Teflon material
- + Double function: head circumference with the front side of the tape and facial symmetry with the rear side
- + Easy-to-read, color-coded precise results
- + Practical dispenser (content: 15 tapes)

Measuring range	3–59 cm
Graduation	1 mm

Precise and easy-to-read measurements made possible by clear, red markings.

Measuring stations

Measuring and weighing in a single step.

Measuring stations let you measure and weigh in one step to effectively determine patient height and weight. Be it an ultrasonic measuring station or measuring station with digital head slider, seca offers state-of-the-art technology, high-quality materials, elegant design and functions that make daily medical routine easier. EMR-validation means that the user no longer has to record the measured data manually and the seca Scale-up Line displays the name or ID of the patient.

seca Scale-up Line

EMR-validated ultrasonic measuring station with ID-Display and optional handrail

- + Display shows name or identification number (ID) of users and patients for increased safety
- + Data transmission controlled by touchscreen display
- + Outstanding precision and high-speed measuring thanks to perfected ultrasound technology
- + Large platform made of tested seca Bearclaw Glass® for absolute breakage resistance and perfect hygiene
- + Illuminated LED footprints in the weighing platform show patients the correct standing position for accurate height measurement
- + Voice guidance to support the measurement process
- + Optional: Safe weighing with sturdy handrail
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

seca.com/scaleup

The displayed patient and user name offer greater control and increases patient safety.

Image contains optional barcode scanner mount seca 463 and barcode scanner from a third-party supplier

Order code **ON SMM AUT NN**

- + Flat scale seca 655
- + Ultrasonic height measurement seca 257

Image contains optional barcode scanner mount seca 463 and barcode scanner from a third-party supplier

Order code **ON SHM AUT NN**

- + Flat scale seca 655
- + Ultrasonic height measurement seca 257
- + Handrail seca 455

Scale

Approval class	III
Capacity	300 kg
Graduation	50 g < 150 kg > 100 g
Functions	Display of user and patient name or ID, TARE, Pre-TARE, mother+child function, HOLD, Auto-HOLD, Auto-BMI, CLEAR, Auto-CLEAR, auto weighing range switch-over, damping, standby mode, Wi-Fi, Ethernet
Accessories	+ Ultrasonic height measurement seca 257 + Handrail seca 455 + Panda seca 459 + Barcode scanner mount seca 463 + Large transport wheel set seca 468

Ultrasonic height measurement

Measuring range	60 – 220 cm
Graduation	1 mm
Functions	Automatic calibration

Illuminated LED footprints in the weighing platform show patients the correct standing position for accurate height measurement.

Nearly effortless transport with extremely robust rubber wheels.

With the cuddly panda seca 459 weighing and measuring is playful and fun for children.

seca 287

EMR-validated ultrasonic measuring station with voice guidance

- + Voice-guided self-measurement assists personnel
- + Outstanding precision and high-speed measuring thanks to perfected ultrasound technology
- + Hands-free measuring prevents the spread of germs
- + Precise 50 g graduation and 300 kg weighing capacity
- + High-quality workmanship and modern design with safety glass and an aluminum profile
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

Scale

Approval class	III
Capacity	300 kg
Graduation	50 g < 150 kg > 100 g
Functions	Pre-TARE, mother+child function, HOLD, Auto-HOLD, Auto-BMI, TARE, CLEAR, Auto-CLEAR, auto weighing range switch-over, damping, SEND, directprint
Accessories	+ Interface module seca 452 + USB adapter seca 456 + Panda seca 459

Ultrasonic height measurement

Measuring range	60–210 cm
Graduation	1 mm
Function	Automatic calibration

Three unique pairs of sensors transmit and receive ultrasonic signals separately and thereby ensure the most precise measurement results.

Thanks to the seca 452 interface module, measured data can be transmitted directly to the EMR system.

seca 285

EMR-validated measuring station for height and weight

- + Weighing and measuring in a single step
- + Precise head alignment with the seca Frankfurt Line
- + Precise 50 g graduation at a very high capacity of up to 300 kg
- + Wide range of height measurement: also suitable for pediatrics
- + Supports the patient consultation with individual printout seca directprint
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

Scale

Approval class	III
Capacity	300 kg
Graduation	50 g < 150 kg > 100 g
Functions	Pre-TARE, mother+child function, HOLD, Auto-HOLD, Auto-BMI, TARE, CLEAR, Auto-CLEAR, auto weighing range switch-over, damping, SEND, directprint
Accessories	+ Interface module seca 452 + USB adapter seca 456 + Panda seca 459

Height measurement

Measuring range	30–220 cm
Graduation	1 mm
Functions	HOLD, automatic switch-off, SEND

The Frankfurt Line, which is offered only by seca, makes sure the patient's head is in exactly the right position.

The seca directprint is the ideal tool for qualified and efficient weight advice.

Column scales

Indestructible support in patient care.

Thanks to their high precision, steadfast mechanics, durable aluminum, steel and cast iron construction as well as many sophisticated details, seca column scales are an indispensable part of the medical world.

When used with a height measuring rod, they double as a measuring station and can determine weight, height and BMI in a single action. The column scales can be easily transported thanks to their transport wheels.

seca 704

EMR-validated column scale with 300 kg capacity

- + Extremely robust, highly precise seca weighing technology with 300 kg capacity
- + Non-tilting base made of heavy duty cast iron
- + Impact- and scratch-resistant powder coating
- + Wide range of functions: BMI, pre-TARE, HOLD, Auto-HOLD, mother+child function, three-step damping
- + Expandable to measuring station with an optional height measuring rod
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

Scale

Approval class	III
Capacity	300 kg
Graduation	50 g < 150 kg > 100 g
Functions	TARE, Pre-TARE, mother+child function, HOLD, Auto-HOLD, BMI, Auto-CLEAR, auto weighing range switch-over, damping, automatic switch-off, SEND
Accessories	+ Interface module seca 452 + USB adapter seca 456 + Measuring rod seca 220 or seca 224 + Panda seca 459 + Power adapter 447 + Switch-mode power adapter 400

Measuring rod seca 220 (optional)

Measuring range	60–200 cm
Graduation	1 mm

Image contains optional measuring rod seca 220

Practical wheels permit mobile use.

The seca 704 can send measurements via the interface module seca 452 directly to any EMR system.

seca 704 s + seca 226

EMR-validated column scale with stadiometer

- + The height measuring rod with a heel plate is ideal for three-point measurement for patients affected by obesity
- + Display faces the user for increased visual ergonomics
- + Non-tilting base made of heavy duty cast iron, resistant to moisture
- + Impact- and scratch-resistant powder coating for a guaranteed long weighing lifespan
- + Wide range of functions: BMI, pre-TARE, HOLD, Auto-HOLD, mother+child function, three-step damping
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

Scale

Approval class	III
Capacity	300 kg
Graduation	50 g < 150 kg > 100 g
Functions	TARE, Pre-TARE, mother+child function, HOLD, Auto-HOLD, BMI, Auto-CLEAR, auto weighing range switch-over, damping, automatic switch-off, SEND
Included	Stadiometer seca 226
Accessories	+ Interface module seca 452 + USB adapter seca 456 + Panda seca 459 + Power adapter 447 + Switch-mode power adapter 400

Stadiometer seca 226 (included)

Measuring range	6 – 230 cm
Graduation	1 mm

Order code **ON SCP ASB NN**

- + Column scale seca 704 s
- + Stadiometer seca 226

The measuring scale is printed on the side of the measuring rod improving visual ergonomics.

Practical wheels permit mobile use.

seca 799

Electronic column scale with BMI function

- + Particularly robust and compact column scale
- + Includes BMI function, TARE and HOLD
- + Robust weighing platform made of steel
- + Easily movable with transport wheels
- + Can be powered with batteries for mobile use or a power adapter for stationary use
- + Expandable into a complete measuring station with an optional height measuring rod

Image contains optional measuring rod seca 220

Scale

Approval class	III
Capacity	200 kg
Graduation	100 g < 150 kg > 200 g
Functions	TARE, HOLD, BMI, weighing range switch-over, automatic switch-off
Accessories	+ Measuring rod seca 220 or seca 224 + Panda seca 459 + Power adapter 447 + Switch-mode power adapter 400

Measuring rod seca 220 (optional)

Measuring range	60 – 200 cm
Graduation	1 mm

The slip resistant surface with an anti-tip column design guarantees a safe and secure foothold.

The BMI calculation can be displayed with the touch of a button.

seca 711

Mechanical column scale with eye-level beam

- + Easy reading and operation at eye level
- + Requires no batteries or other power supply
- + Same level of accuracy as a digital column scale
- + Non-tilting and highly robust base made of cast iron
- + High capacity of 220 kg
- + All parts are corrosion-resistant

Image contains optional measuring rod seca 220

seca 756

Mechanical column scale with BMI display and evaluation

- + Fast and easy BMI determination
- + Simultaneous evaluation of nutritional status
- + Clear circular scale and low platform

Scale

Approval class	III
Capacity	220 kg
Graduation	100 g
Functions	Reset-to-zero function
Accessories	+ Measuring rod seca 220

Measuring rod seca 220 (optional)

Measuring range	60–200 cm
Graduation	1 mm

The scale is printed on both sides so that both the patient and the user can read the weight.

The broad and flat construction provides easy step-on access and a firm foothold.

Scale

Approval class	III
Capacity	160 kg
Graduation	500 g
Functions	BMI, Reset-to-zero function
Accessories	+ Measuring rod seca 224 + Panda seca 459

Measuring rod seca 224 (optional)

Measuring range	60–200 cm
Graduation	1 mm

seca 756 is only available in certain countries.

Once the weight has been measured, an integrated, color-coded BMI scale indicates if the patient is underweight, normal or obese.

Height and weight measurements can be taken at once with the optional telescopic measuring rod seca 224.

Flat scales

Saving on space does not mean saving on patient benefits.

Where space is limited, there remains plenty of space for seca flat scales. Their wide array of functions make the day-to-day routines in medical care easier. Additional features include high weight capacity of up to 300 kg and long-battery life. Useful accessories such as carrying cases and a stand for a separate display make using seca flat scales even more enjoyable.

seca 651

EMR-validated flat scale with ID-Display and stable glass platform

- + Display shows name or identification number (ID) of users and patients for more safety
- + Data transmission controlled on the touchscreen
- + Large platform made of tested seca Bearclaw Glass® for absolute breakage resistance and perfect hygiene
- + Glass surface is easy to clean and disinfect (more hygienic than plastic)
- + Adjustable damping for fast and accurate weighing
- + Expandable to measuring station with handrail
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

seca.com/scaleup

Approval class	III
Capacity	300 kg
Graduation	50 g < 150 kg > 100 g
Functions	Display of user and patient name or ID, customizable shortcut buttons, TARE, Pre-TARE, mother+child function, HOLD, Auto-HOLD, Auto-BMI, CLEAR, Auto-CLEAR, auto weighing range switch-over, damping, Wi-Fi, Ethernet
Accessories	+ Ultrasonic height measurement seca 257 in combination with adapter seca 464 + Handrail seca 455

seca 635

EMR-validated flat scale with extra-large platform

- + Extra-large platform with 300 kg capacity
- + Cable remote display for wall mounting or table installation
- + Includes BMI calculator and three-stage damping
- + Wide range of functions: TARE, pre-TARE, HOLD and Auto-HOLD
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

The patient's BMI can be determined when their height is entered.

It's easy to step onto the extra large, slip proof platform.

Accessory **seca 472**

Stand for cable remote display

- + Sturdy construction for cable remote display of the scales seca 635, seca 657 and seca 675

Approval class	III
Capacity	300 kg
Graduation	100 g < 200 kg > 200 g
Functions	TARE, Pre-TARE, HOLD, Auto-HOLD, BMI, Auto-CLEAR, auto weighing range switch-over, automatic switch-off, damping, SEND
Accessories	+ Interface module seca 452 + USB adapter seca 456 + Stand for cable remote display seca 472 + Power adapter 447 + Switch-mode power adapter 400

seca 899

Digital flat scale with cable remote display

- + Cable remote display for wall mounting or table installation
- + Robust and durable seca quality
- + Support feet for strong stability
- + Can be powered with batteries for mobile use or a power adapter for stationary use

Approval class	III
Capacity	200 kg
Graduation	100 g < 150 kg > 200 g
Functions	TARE, HOLD, BMI, automatic switch-off
Accessories	+ Stadiometer seca 217 in combination with adapter element seca 437 + Power adapter 447 + Switch-mode power adapter 400 + Carrying cases seca 409 / seca 421 or seca 414 (for combination with stadiometer and adapter element)

The angle of the display can be adjusted for easy reading and can be used separately from the base.

seca 878

Flat scale with foot switches and double display

- + Double display lets the doctor and patient read simultaneously
- + Can weigh 10,000 times with a single set of batteries
- + May be used standing up thanks to the foot switches
- + Mother+child function to weigh toddlers

Approval class	III
Capacity	200 kg
Graduation	100 g < 150 kg > 200 g
Functions	Mother+child function, HOLD, automatic switch-off
Accessories	+ Stadiometer seca 217 in combination with adapter element seca 437 + Power adapter 447 + Switch-mode power adapter 400 + Carrying cases seca 409 / seca 421 or seca 414 (for combination with stadiometer and adapter element)

The two foot switches on the front side of the scale can be operated by foot.

seca 877

Digital flat scale with foot pedal

- + Precise weighing technology for medical use
- + May be used standing up thanks to the foot pedals and tap-on function
- + Support feet for increased stability
- + Can weigh 10,000 times with a single set of batteries
- + Mother+child function to weigh toddlers

Approval class	III
Capacity	200 kg
Graduation	100 g < 150 kg > 200 g
Functions	Mother+child function, tap-on automatic switch-on, automatic switch-off
Accessories	+ Stadiometer seca 217 in combination with adapter element seca 437 + Carrying cases seca 409 / seca 415 or seca 414 (for combination with stadiometer and adapter element)

Tap-on function for weighing without turning on the scales.

seca 878 dr

Flat scale with customizable label

- + Customizable label helps minimize scale misplacement
- + Inexpensive, reliable and durable: seca quality that pays off
- + Double display allows the doctor and patient to read simultaneously
- + Leveling feet for strong stability
- + Mother+child function for hassle-free weighing of toddlers

seca.com/doctorscale

Approval class	III
Capacity	200 kg
Graduation	100 g < 150 kg > 200 g
Functions	Mother+child function, HOLD, automatic switch-off
Accessories	+ Stadiometer seca 217 in combination with adapter element seca 437 + Power adapter 447 + Switch-mode power adapter 400 + Carrying cases seca 409 / seca 415 or seca 414 (for combination with stadiometer and adapter element)

Possible combination

seca 899 / 878 / 877 / 878 dr,
seca 217, seca 437 and seca 414

Mobile measuring and weighing system for schoolchildren and adults

- + Combined measuring and weighing of schoolchildren and adults
- + Digital flat scale and stadiometer with adapter element practically stowed in a spacious carrying case

seca 761

Mechanical flat scale with 1 kg graduation

- + Robust construction
- + Large, easy-to-read circular scale
- + Large, non-slip mat
- + Precise and durable
- + Clip fixation system for easy rubber-mat exchange
- + Galvanized mechanics

Approval class	III
Capacity	150 kg
Graduation	1 kg
Functions	Reset-to-zero function

The especially large circular display allows easy reading of measurements.
seca 761 is only available in certain countries.

Height measuring systems

When the quality is right, so are the measurements.

Measuring rods and circumference measuring tapes are relatively simple devices in routine medical work – however, they still have to fulfill challenging clinical requirements. That's why seca offers non-abrasive measurement scales and parts made of distortion-resistant anodized aluminum. For quality you can feel – in devices that transmit your data at the touch of a button and in headpieces that always glide smoothly into position to guarantee consistently precise measurements.

seca 274

EMR-validated, freestanding stadiometer with digital display

- + Digital height measurement: comfortable and precise
- + Precise head alignment by the seca Frankfurt Line
- + High-quality glass platform with heel plate
- + Sliding headpiece with backlit digital display
- + Leveling feet provide a very stable base
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

Measuring range	30 – 220 cm
Graduation	1 mm
Functions	HOLD, automatic switch-off, SEND
Accessories	+ USB adapter seca 456

With the patient's head precisely positioned, the seca Frankfurt Line guarantees exact measurements.

The leveling feet provide a stable base, even on uneven surfaces.

seca 264

Wall-mounted, EMR-validated stadiometer with display on the headpiece

- + Digitally measures small children and adults
- + Frankfurt Line for precise head alignment
- + Backlit LCD display in headpiece
- + Non-slip rubber mat with heel positioner
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

Measuring range	30 – 220 cm
Graduation	1 mm
Functions	HOLD, automatic switch-off, SEND
Accessories	+ USB adapter seca 456

The backlit display on the headpiece is very easy to read.

The easy-to-clean mat of the seca 264 puts the patient's feet in the right position and gives the patient a feeling of safety and comfort.

seca 217**Stable stadiometer for mobile height measurement**

- + Parts fit together perfectly for easy transport
- + Wall spacer for additional stability
- + Robust platform for secure stance
- + Includes heel positioner for optimal three-point height measurement
- + Adapter element seca 437 for combination with a flat scale

Measuring range	20–205 cm
Graduation	1 mm
Accessories	+ Adapter element seca 437 (for combination with flat scale seca 899, seca 878 dr or seca 877) + Carrying cases seca 412 or seca 409 / seca 414 (for combination with scale and adapter element)

The adapter element seca 437 connects the stadiometer to a flat scale.

The wall spacer provides extra stability and ensures precise measurement results.

The robust base plate guarantees a sturdy stance.

seca 213**Portable stadiometer**

- + Simple and easy to set up – no wall fastening necessary
- + Large floor plate ensures stability
- + Includes heel positioner for ideal three-point measurement
- + The measuring rod can be dismantled and stored securely in the base for easy transport

Measuring range	20–205 cm
Graduation	1 mm
Accessories	+ Carrying case seca 412

The integrated handle and securely locking parts make the stadiometer easy to carry.

Large base for patient stability.

**seca 222****Mechanical telescopic measuring rod with large measuring range**

- + Telescopic, durable aluminum measuring rod with large measurement range up to 230 cm
- + Includes heel positioner for ideal three-point measurement
- + Developed for wall installation

Measuring range	6–230 cm
Graduation	1 mm

The foot positioner ensures exact positioning and precise measurements.

seca 216

Mechanical measuring rod for children and adults

- + Easy-to-read measurement scale
- + Adjustable head positioner
- + Choice of two units of measurement
- + Simple assembly

Measuring range	max. 138 cm, variable from 3.5–230 cm
Graduation	1 mm

Whether for children or adults – the measuring range can be adjusted as needed. The graduation index can be fixed in place with the locking screw.

seca 206

Mechanical measuring tape

- + Space-saving, roll-up mechanism
- + Simple read-out of results through display window
- + Durable tape made of metal

Measuring range	0–220 cm
Graduation	1 mm

The wall-mounted roll measuring tape is particularly space-saving and allows for quick and easy measuring.

seca 203

Ergonomic circumference measuring tape with extra Waist-To-Hip-Ratio calculator (WHR)

- + Retractable measuring tape for precise body measurements
- + WHR calculator for quick determination of body fat distribution
- + WHR scale of metal for long life

Measuring range	0–205 cm
Graduation	1 mm
Function	WHR calculator

The seca 203 circumference measuring tape also has a scale that determines the waist-to-hip ratio (WHR).

seca 201

Ergonomic circumference measuring tape

- + Retractable measuring tape for precise body measurements
- + Printed scale on side makes results easy-to-read
- + Convenient one-handed operation fasten start of tape to retraction mechanism
- + Compact and easy to store

Measuring range	0–205 cm
Graduation	1 mm

Handrail scales

Firm support for safe weighing.

Handrail scales from seca offer every patient a secure grip and are the best fall prevention when weighing. They are designed to be easily accessible and to weigh precisely, no matter where and how the patient is supported. Safe access and support options simplify workflows and save staff the hassle of careful positioning of the patient or adjustments to the scale before weighing. Practical features such as transport wheels and folding functions make the large scales transportable and stowable.

seca Scale-up Line

EMR-validated handrail scale with ID-Display and optional height measurement

- + Display shows user and patient names or IDs for increased patient safety
- + Data transmission controlled by touchscreen
- + Safe weighing with a stable handrail
- + Lightweight, sophisticated design and extremely robust thanks to steel handrail that is directly attached to the cast iron pedestal
- + Large platform made of tested seca Bearclaw Glass® for absolute breakage resistance and perfect hygiene
- + Optional: Precise, fast and hands-free height measurement with modern ultrasonic technology
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

seca.com/scaleup

Image contains optional barcode scanner mount seca 463 and barcode scanner from a third-party supplier

Order code **ON SHM ANT NN**

- + Flat scale seca 655
- + Handrail seca 455

The displayed user and patient name offer greater control and increases patient safety.

Image contains optional barcode scanner mount seca 463 and barcode scanner from a third-party supplier

Order code **ON SHM AUT NN**

- + Flat scale seca 655
- + Handrail seca 455
- + Ultrasonic height measurement seca 257

Scale

Approval class	III
Capacity	300 kg
Graduation	50 g < 150 kg > 100 g
Functions	Display of user and patient name or ID, TARE, Pre-TARE, mother+child function, HOLD, Auto-HOLD, Auto-BMI, CLEAR, Auto-CLEAR, auto weighing range switch-over, damping, standby mode, Wi-Fi, Ethernet
Accessories	+ Handrail seca 455 + Ultrasonic height measurement seca 257 + Barcode scanner mount seca 463 + Panda seca 459 + Large transport wheel set seca 468

Ultrasonic height measurement

Measuring range	60 – 220 cm
Graduation	1 mm
Functions	Automatic calibration

Illuminated LED footprints in the weighing platform show patients the correct standing position for accurate height measurement.

Nearly effortless transport with extremely robust rubber wheels.

With the cuddly panda seca 459 weighing and measuring is playful and fun for children.

seca 685

EMR-validated multifunctional scale

- + Safe weighing of standing, sitting or wheelchair patients
- + Large, easy to access platform
- + Wheel barrier provides extra safety
- + Easy to read display
- + Mobile due to integrated transport wheels
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

Patient can stand or sit when being weighed.

The rotating display can be oriented towards the patient or medical personnel.

Thanks to the ramp, wheelchairs can be wheeled on with ease and comfort.

Approval class	III
Capacity	300 kg
Graduation	100 g < 200 kg > 200 g
Functions	TARE, Pre-TARE, HOLD, Auto-HOLD, BMI, Auto-CLEAR, auto weighing range switch-over, damping, SEND
Accessories	+ Interface module seca 452 + USB adapter seca 456

seca 645

EMR-validated handrail scale with generous platform

- + Safe weighing due to sturdy handrail
- + Large non-slip platform with 300 kg capacity
- + Swiveling display
- + With a BMI calculator and damping system
- + Mobile due to transport wheels
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

Image contains optional measuring rod seca 223

Scale

Approval class	III
Capacity	300 kg
Graduation	100 g < 200 kg > 200 g
Functions	TARE, Pre-TARE, HOLD, Auto-HOLD, BMI, Auto-CLEAR, automatic switch-off, auto weighing range switch-over, damping, SEND
Accessories	+ Interface module seca 452 + USB adapter seca 456 + Measuring rod seca 223

Measuring rod seca 223

Measuring range	6 – 230 cm
Graduation	1 mm

The display can be rotated in every direction.

Because the handrail is part of the weight sensitive area, measurements are absolutely sure even if the patient supports himself on it.

Wheelchair scales

Remove barriers with wheelchair scales from seca.

Weighing immobile patients can be a complicated process, but it doesn't have to be. The weighing solutions from seca offer the possibility of weighing patients in wheelchairs or even in hospital beds. The low-level, generously dimensioned platforms with ramps and other innovative functions guarantee comfortable, effortless and precise weighing.

seca 677

EMR-validated wheelchair scale with handrail and transport wheels

- + Large wheelchair accessible platform
- + Convenient and foldable to save space
- + Mobile due to transport wheels
- + Handrail as a standing aid
- + Non-slip rubber mat
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

The scale can be folded for easy transport.

Integrated ramps on both sides allow for the safe and comfortable operation with a wheelchair.

Approval class	III
Capacity	300 kg
Graduation	100 g < 200 kg > 200 g
Functions	TARE, Pre-TARE, HOLD, Auto-HOLD, BMI, Auto-CLEAR, auto weighing range switch-over, damping, SEND
Accessories	+ Interface module seca 452 + USB adapter seca 456

seca 665

EMR-validated electronic wheelchair scale

- + Side rails on the platform ensure safe rolling of a wheelchair onto and from the scale
- + High capacity of up to 300 kg
- + Flat platform with self-lowering ramp
- + Easy to fold together and transport
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

The platform's side rails keep a wheelchair safe and secure.

The seca 665 simply folds up and moves easily across the floor on wheels.

Approval class	III
Capacity	300 kg
Graduation	100 g < 200 kg > 200 g
Functions	TARE, Pre-TARE, HOLD, Auto-HOLD, BMI, Auto-CLEAR, automatic switch-off, auto weighing range switch-over, damping, SEND
Accessories	+ Interface module seca 452 + USB adapter seca 456

seca 657

EMR-validated electronic platform scale with innovative memory function

- + Especially spacious platform for all common wheeled systems
- + Stable construction with very high capacity
- + Transportable due to wheels and integrated handles
- + Innovative memory function for determining precise weight of patient
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

The seca 657 can determine weight without requiring the patient to leave the bed or stretcher.

Due to the wheels and integrated handles, the seca 657 can be easily stowed away to save space.

Approval class	III
Capacity	300 kg
Graduation	100 g < 200 kg > 200 g
Functions	TARE, Pre-TARE, HOLD, Auto-HOLD, BMI, Auto-CLEAR, auto weighing range switch-over, damping, automatic switch-off, SEND
Accessories	+ Interface module seca 452 + USB adapter seca 456 + Stand for cable remote display seca 472

Accessory seca 472

Stand for cable remote display

+ Stable solution for cable remote display of the scales seca 635, seca 657 and seca 675

seca 675

EMR-validated electronic platform scale

- + Generously sized platform with high capacity of up to 300 kg
- + Flexible cable remote display with 2.3 m cable length
- + Suitable for weighing persons in a wheelchair or on a chair
- + Transport wheels and integrated handles for mobile use
- + Includes ramp for easy rolling onto the scale
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

Approval class	III
Capacity	300 kg
Graduation	100 g < 200 kg > 200 g
Functions	TARE, Pre-TARE, HOLD, Auto-HOLD, BMI, auto weighing range switch-over, damping
Accessories	+ Interface module seca 452 + Stand for cable remote display seca 472

Chair scales

Competence takes the chair.

How can you gently and carefully weigh bedridden patients or people who are unsteady on their feet? The best choice is a seca chair scale, which you can take directly to the patient. That saves you – and nursing staff – from unnecessary steps.

seca 959

EMR-validated chair scale with precise graduation

- + 50 g graduation for exact measurement while sitting
- + Fold-up arm and footrests for easy access
- + Sophisticated engineering and robust construction for a long lifespan
- + Suitable for patients affected by obesity with up to 300 kg weighing capacity
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

Approval class	III
Capacity	300 kg
Graduation	50 g < 150 kg > 100 g < 250 kg > 200 g
Functions	TARE, Pre-TARE, HOLD, Auto-HOLD, BMI, Auto-CLEAR, auto weighing range switch-over, damping, automatic switch-off, SEND
Accessories	+ Interface module seca 452 + USB adapter seca 456 + Battery for longer mobile use seca 454

With its exceptionally high capacity of up to 300 kg, the BMI function and options to use mains or battery power, the chair scale seca 959 is ideal for use in any situation.

The large footrests can be folded completely out of the way so that the patient can safely and comfortably take a seat.

seca 956

Chair scale for weighing while seated

- + The simple solution for patients with decreased mobility
- + Fold-up arm and footrests make sitting down easy
- + Wheels include brakes to ensure the scale stays in place when needed
- + Intuitive user interface simplifies use
- + Offers all essential functions for maximum efficiency

The seca 956 runs on batteries for mobile use and offers a capacity of up to 200 kg.

The footrests can be folded away to make it easier for patients to stand up and sit down.

Approval class	III
Capacity	200 kg
Graduation	100 g
Functions	TARE, HOLD, automatic switch-off

Specialized scales

Small size, big help.

As a specialist for medical measuring and weighing, seca naturally offers solutions for special applications. For instance, the splash-protected organ and diaper scale and the extremely precise portion and diet scale for clinical nutritionists.

seca 856

Electronic organ and diaper scale with stainless steel cover

- + Complete stainless steel-surface reduces contamination
- + Easy to clean and disinfect
- + Scale completely sealed from moisture
- + Pre-TARE function for permanent use with the container of your choice
- + Increase in metal housing protects display from liquid

Approval class	unapproved
----------------	------------

Capacity	5 kg
----------	------

Graduation	1 g < 3 kg > 2 g
------------	------------------

Functions	TARE, Pre-TARE, HOLD, automatic switch-off
-----------	--

The stainless steel surface is tough and easy to clean.

seca 852

Digital portion and diet scale

- + Gram-precise display for the accurate weighing of food
- + Scale can be stowed in compact bowl
- + Food-safe plastic bowl is easy to clean
- + High 3,000 gram capacity
- + With TARE function

Approval class	unapproved
----------------	------------

Capacity	3 kg
----------	------

Graduation	1 g
------------	-----

Functions	TARE, automatic switch-off
-----------	----------------------------

The fine graduation of just one gram permits precise weighing.

The scale can be conveniently stored within the compact bowl.

BODY COMPOSITION

See more than just weight and height –
the validated BIA solution for medical use.

Height and weight alone are not enough when it comes to taking a deeper look at body composition. After all, what about the proportions of fat, muscle or water? These are important parameters to support diagnosis and therapy. That's exactly why we at seca developed medical Body Composition Analyzers which provide all of these values and have been validated^{1,2} against the medical science gold standard: this makes it possible to determine the fat mass, visceral fat, extracellular and intracellular water and skeletal muscle mass with medical precision. In short: The seca mBCA devices are innovative instruments to support diagnosis and therapy control and enable successful patient consultations.

¹ Quantification of whole-body and segmental skeletal muscle mass using phase-sensitive 8-electrode medical bioelectrical impedance devices. Bösy-Westphal A, Jensen B, Braun W, Pourhassan M, Gallagher D, Müller MJ. Eur J Clin Nutr. 2017 Mar 22. doi: 10.1038/ejcn.2017.27
² What makes a BIA equation unique? Validity of eight-electrode multifrequency BIA to estimate body Composition in a healthy adult population. Bösy-Westphal A, Schautz B, Later W, Kehayias JJ, Gallagher D, Müller MJ. Eur J Clin Nutr 2013; 67: 14-21; doi: 10.1038/ejcn.2012.160

Medical Body Composition Analyzers

Where BMI ends, the seca medical Body Composition Analyzers begin.

seca mBCA 515

Medical Body Composition Analyzer for determining body composition while standing

- + Unique accuracy through whole body MRI validation and 4C model
- + Handrail with fixed handle positions: Measurements are reproducible and reliable
- + Validation studies are bundled and published in the European Journal of Clinical Nutrition 2013/2017, among others
- + Measuring time is only 17 seconds
- + Possible to evaluate the measurement directly on the monitor
- + Quick to understand and clear graphics with normal ranges
- + Easy-to-use, 360° rotatable touchscreen
- + Extra-large platform: Enough space even for extremely tall people or people affected by severe obesity
- + Scientific mode may be selected, ideal for studies, science and teaching
- + Three handle options for finer graduation of arm posture and measurement height
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

mbca.seca.com

Approval class	III
Capacity	300 kg
Graduation	50 g < 150 kg > 100 g
Display type	8.4" 360° rotatable touchscreen
Connectivity	Ethernet, seca 360° wireless technology
Ports	USB 2.0
Measurement method	8-point Bioelectrical Impedance Analysis
Measurement current	100 µA
Measurement duration	17 seconds
Software	seca analytics 115

Hand-held electrodes prevent measurement errors and ensure that results are always reproducible.

The large, easy-access, fast-cleaning, safety glass weighing platform is suitable for use by patients weighing up to 300 kg.

seca mBCA 555

Medical Body Composition Analyzer
with optional ultrasonic height
measurement

- + Unique accuracy through whole body MRI validation (skeletal muscle mass) and 4C model (fat mass)
- + Handrail with fixed handle positions: Measurements are comparable and reliable
- + Validation studies are bundled and published in the European Journal of Clinical Nutrition 2013/2017, among others
- + Measuring time is only 24 seconds
- + Graphics which are fast and easy to understand with normal ranges
- + The evaluation uses seca analytics 125 software
- + Foot-mounted LEDs embedded in the platform show the various positions and give patients a sense of safety and orientation
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

- + Easy mounting of the seca mBCA 525 for mobile clinical use
- + Convenient, height-adjustable and equipped with additional storage basket for documents, scanner or electrodes

seca mBCA Software

Do more with your measurement results.

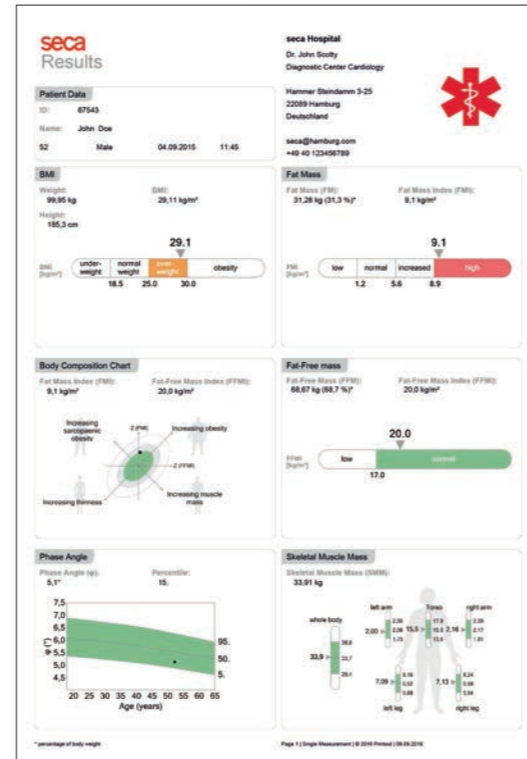

With our software solutions, you can professionally document seca mBCA measurement results, evaluate them and illustrate any changes in body composition. Specific graphics adapted to everyday clinical practice play an integral role in patient motivation, diagnosis, consultation and treatment planning.

Make the body composition visible

The parameter models developed in collaboration with medical users provide a quick overview of individual nutritional status and help to immediately recognize functional disorders. In addition, parameter models used to answer specific questions can be individually compiled (such as for optimal treatment support in sarcopenia).

The cloud software that fits your needs

The software provides fast and secure access to all current and previously collected measurements even from home or on-the-go. Thanks to the new cloud-based software delivery, all administrative IT issues are taken care of for you. This frees up your time so you can fully concentrate on your clinical or medical work. Your data is securely stored and protected from data loss and third-party access. Stay up-to-date on research and science and benefit from the software's continued maintenance and ongoing development.

All examination results for each patient can be compiled into a PDF of one or more pages. The findings can be customized for individual consultations.

VITAL SIGNS

Simply and routinely monitor vital signs with the seca EMR-validated spot-check monitor.

Monitoring vital signs is a time-consuming task in hospitals and medical practices. The seca mVSA was developed to support these routine checks and makes these measurements more efficient. The four vital parameters blood pressure, SpO₂, pulse rate, and temperature can be measured in one work step using the components integrated into the spot-check-monitor. The unique feature of the mVSA is the additional option to measure body composition consisting of fat mass, muscle mass, and body water through a Bioelectrical Impedance Analysis using the integrated measuring mat. You can measure the most important parameters and gain deeper insights into the health status of your patients. You thereby save time and gain additional certainty for the preparation of diagnoses and therapies.

Medical Vital Signs Analyzer

The world's first medical vital signs analyzer with a bioimpedance analysis option.

seca mVSA

Spot-check-monitor for customized configuration

- + Essential vital signs measurement of blood pressure, SpO₂, pulse and temperature
- + Quick and easy determination of body composition such as body fat, water and muscle mass with the optional BIA measuring mat seca mBCA 531
- + Easy-to-understand graphical presentation of the measurement results on the touchscreen monitor
- + Large internal memory for up to 70,000 measurements
- + Integrated lithium-ion battery in the monitor
- + EMR-validated: transmit measured data directly to any Electronic Medical Record (EMR) system

INTEGRATION

Ready for the hospital of the future – all measured data is instantly available in the electronic medical record.

Digital processes in everyday hospital life not only save costs and time, above all else, they increase patient safety. Transcription errors such as transposed numbers, comma errors or swapped patient names can lead to serious drug dosing inaccuracies in the worst case^{1,2}. At best, they're just an additional burden for the personnel and a cause of inefficient work processes (lost measurement results, duplicate measurements). seca integration solutions eliminate a large part of the manual transmission errors from the outset, effectively relieve personnel and increase patient safety.

¹ Preventing pediatric medication errors (2008). In: Sentinel Event Alert, 39, pp. 1-5
² Authority, P. P. S. (2009): Medication errors: significance of accurate patient weights. Pennsylvania Patient Safety Advisory, 6(1), pp. 10-15.

seca integration solutions

All measuring results are immediately sent to the Electronic Medical Record (EMR).

With our seca integration solutions, you are sustainably equipped to make work processes more efficient and, above all, safer. seca is the only scale provider that can completely integrate encrypted height, weight and other vital signs into the Electronic Medical Record (EMR).

All integration advantages at a glance

+ Patient safety

Transmission errors and resulting medication inaccuracies are a thing of the past.

+ User safety

The new workflow gives users a sense of security and provides relief. Manual transmission errors are reduced and duplicate measurements caused by missed or lost data are avoided.

+ Central data availability

Correct patient data is provided centrally in real time and may, for example, be retrieved in the hospital from each station.

+ Future security

With the integration of weight and height, you're one step closer to full system integration. You save money, increase process reliability and show your patients what modern measuring and weighing can look like.

What only seca can offer you

+ Data integration

To integrate seca devices into your digital processes, we support established and validated exchange formats (such as HL7, JSON, CSV, XML) and also provide validated system solutions for partner companies like Cerner.

+ Wireless connection

seca devices are integrated into existing network infrastructures using secure authentication methods (such as TLS encryption).

+ Scalable integration platform

seca devices are integrated, managed and monitored via a central gateway. In addition, software updates can be automatically imported from a central point to connected devices.

+ Data security

Encrypted communication between devices and the server protects sensitive patient data.

+ User friendly

We contribute not only our equipment and technical expertise. You also benefit from our experience and expertise in efficiently implementing integration projects. We never lose sight of your needs and technical requirements.

+ Everything from one place

Hardware and software come centrally and directly from seca.

+ We're here to help

Our integration team accompanies and supports you from the beginning to going live and beyond. Specially developed questionnaires and documentation templates enable a successful project flow.

+ Maintenance and support

Continuous maintenance and further development of the software as well as competent contact partners in worldwide support.

Simple and secure: workflow with seca integration solutions

We offer you a variety of workflows that fit perfectly into your daily routine.

The example shows you the process of integrating scales and measuring stations in a hospital.

1 Identify user

2 Identify patient

3 Measure weight and height

4 Send measurement results to your EMR system at the touch of a button

5 Green LEDs confirm data integration

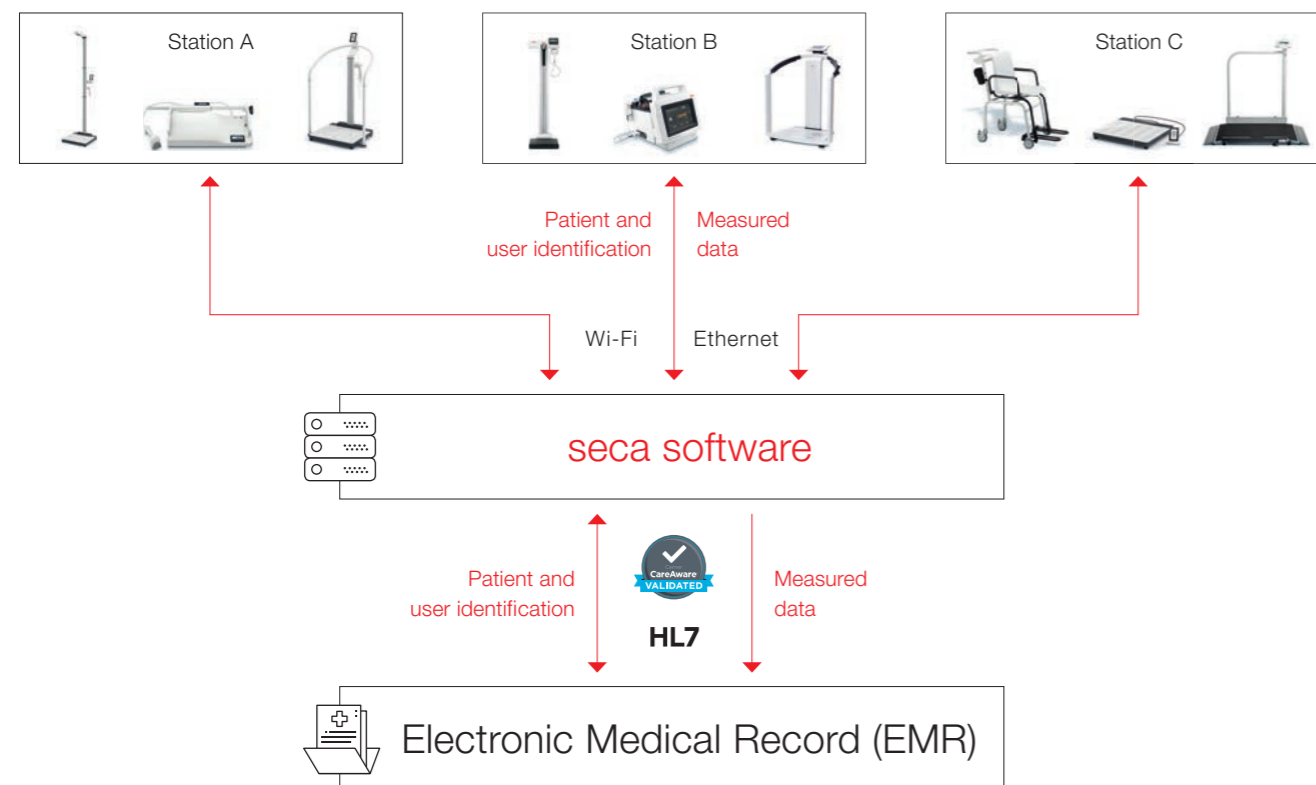

6 Secure integration into your EMR system

We make complex matters simple

In order for weight and height to be smoothly integrated in the electronic medical record, the EMR system, network infrastructure and your seca products need to be coordinated and they need to “understand” each other. That’s exactly what the seca integration solution makes possible with the use of seca software. In the process, our software just runs in the background. The seca scale or measuring station controls the transmission of measuring results and also displays the successful transmission.

EMR-validated seca products

Professional project management with the seca integration team

No two medical facilities are alike. So that EMR integration is perfectly matched to your IT system and your workflows, we adapt the integration project to your respective requirements and needs. For this purpose, seca has developed a three-stage project management process that will surely lead you to successful EMR integration.

1. Preparation

We present you with the comprehensive possibilities of seca integration solutions and would love to give you a live demonstration. Our team takes the time to understand your challenges and technical requirements.

2. Implementation

At the beginning of the project, we set up schedules and checklists that are tailored to your challenges. Afterwards, the different integration steps will be accompanied and executed by our team.

3. Going live and service

Before integration goes live, all processes are thoroughly tested by our specialists. Our service doesn't end once the system goes live. User trainings, worldwide service and software updates offer an allround worry-free package.

Integration in all EMR systems

For customers who already work with Cerner, our integration solution is particularly easy since it has been validated for Cerner CareAware VitalsLink™.

In the steadily growing EMR market, we also offer solutions for many other systems. Contact our experienced team of experts for your individual system integration solution.

“Our competent and experienced team of integration specialists works according to a continuously optimized process that guarantees a safe, effective and satisfactory project flow for customers. The understanding of individual workflow requirements, the polling of technical requirements, the timely implementation and the expert support, remote or on-site, characterize the success of our work.”

SERVICE

Maintenance, spare parts, software support: pre- and post-sales service from seca ensures your hospital or practice run smoothly.

seca accompanies you throughout all areas of service before and after your purchase: whether it be product demonstrations, phone service or software support. We ensure you are never left alone guaranteeing a smooth-running operation in your hospital or practice. That's what we stand for with our award-winning and certified service.

How our seca service brings you relief

Distinguished worldwide—developed for your needs: our seca service.

Award-winning seca service not only ensures the installation and integration of our products. We also offer customized services worldwide, like our repair service, our calibration and adjustment service or customized product and interpretation trainings.

seca product demonstration

Would you like a comprehensive consultation to help you choose the right seca product? No problem! seca regional sales specialists or our seca partners will gladly come to your business and show you the seca models you selected.

seca product trainings

We make you into a seca professional. We train you and your staff on the practical use of your seca product – with our BIA devices, among other things, in the interpretation of parameters. And that with a focus on your individual medical specialty.

seca integration solutions

seca takes care of the complete integration of your seca devices into your EMR system. After a detailed analysis of the status quo of your digital infrastructure, we'll accompany the integration up to the first transmission of readings and beyond with regular software updates and the maintenance of your device.

seca repair service

We repair scales of all manufacturers quickly, easily and inexpensively including packaging. You'll get your scale back within a matter of days!

seca calibration service

The seca calibration service package includes all services related to maintenance, calibration, adjustment and disinfection of your scales – including a recalibration success guarantee.

seca 8 year warranty*

seca offers 4 year warranty for all digital medical scales (calibration class III). The guarantee of all wireless scales (calibration class III) can be extended up to 8 years.

*The 8 year warranty is valid only in the United Kingdom and does not include the seca medical Body Composition Analyzers.

GENERAL

Dimensions (W x H x D)	254 x 262 x 278 mm
Weight	In-ear thermometer version ca. 3 kg
Display type	7" touchscreen
Power supply	Built-in power adapter, internal rechargeable lithium-ion battery
Medical device class	Ila
Connectivity	Wi-Fi, Ethernet, seca 360° wireless technology
Ports	USB 2.0
Compatible printers	Conventional laser and ink jet printers via the seca analytics 115 PC software

BLOOD PRESSURE MEASUREMENT

Measuring procedure	oscillometric, deflation or inflation measurement	
Measurement range	pSYS: 25 – 280 mmHg; pDIA: 10 – 220 mmHg; pMAP: 15 – 260 mmHg; Adjustable pressure for deflation measurement (80 – 280 mmHg)	
Measurement accuracy (clinically validated according to ISO 81060)	Measurement accuracy of deflation measurement:	Measurement accuracy of inflation measurement:
	Mean deviation systole 0.10 mmHg	Mean deviation systole 0.36 mmHg
	Standard deviation systole 3.24 mmHg	Standard deviation systole 4.27 mmHg
	Mean deviation diastole -0.20 mmHg	Mean deviation diastole -0.12 mmHg
	Standard deviation diastole 2.95 mmHg	Standard deviation diastole 3.78 mmHg
Measurement certainty	Maximum cuff pressure 300 mmHg; automatic pressure release > 330 mmHg	
Measurement duration	Normal: 15 – 20 sec. / max. 90 sec. (adults)	
Measuring range (PR)	Deflation measurement: 30 min ⁻¹ – 240 min ⁻¹ / Inflation measurement: 45 min ⁻¹ – 200 min ⁻¹	
Measurement accuracy (PR) (under laboratory conditions)	max. +/- 3 min ⁻¹ / 3% (the larger value applies)	

SpO₂

	Masimo	seca
Measurement method	Pulse oximetry	Pulse oximetry
Measurement range (SpO ₂)	0–100 %	0–100 %
Measurement precision (SpO ₂)	SpO ₂ – resting = < 2 % SpO ₂ – in motion = < 3 %	SpO ₂ – resting (60 %–100 %) ± 2 Arms; SpO ₂ – in motion (70 %–100 %) ± 3 Arms
Measurement range (PR)	Pulse rate PR 25 bpm to 240 bpm; Perfusion index measurement range 0.02 %–20 %	Pulse rate PR (Standard) 30 bpm to 240 bpm; Pulse rate PR (Enhanced) 20 bpm to 300 bpm
Measurement accuracy (PR)	PR – resting = < 3 bpm; PR – in motion = < 5 bpm	PR – resting < 2 bpm; PR – in motion n/a

TEMPERATURE MEASUREMENT

	Filac 3000®	Genius® 2
Measurement methods	axillary/oral, rectal (direct or predictive)	in ear (direct)
Measurement range	direct 30 °C–43 °C predictive 35.5 °C–42 °C	33–42 °C
Measurement accuracy	direct ± 0.1 °C; predictive ± 0.1 °C	Ambient temperature: 25 °C Target temperature: 36.7 °C–38.9 °C ± 0.1 °C Ambient temperature: 16 °C–33 °C Target temperature: 33 °C–42 °C ± 0.2 °C
Measurement duration	direct 60–120 sec.; predictive (oral) 3–10 sec.; predictive (axillary/rectal) 8–14 sec.	< 2 sec.

BIOELECTRICAL IMPEDANCE ANALYSIS

Measurement method	8-point Bioelectrical Impedance Analysis
Measurement frequencies	1; 2; 5; 10; 20; 50; 100; 200; 500 kHz
Measurement segments	right arm, left arm, right leg, left leg, right half of body, left half of body, torso
Measurement current	100 µA
Measurements	Impedance (Z), Resistance (R), Reactance (Xc), Phase angle (φ)
Measurement duration	30 seconds

SOFTWARE

With BIA: PC software seca analytics 115 (with one workstation license included), compatible with EMR ready seca measuring systems

EMR-VALIDATED

to any EMR system

CE 0123

seca mVSA

Spot-Check-monitor with NIBP, Masimo SpO₂ technology and oral/axillary temperature probe

seca technical terms – a brief explanation.

Measuring systems and scales:

TARE function	Useful when any additional weight (e.g. diapers or blankets of babies/small children and also chairs or wheelchairs) is not to be included in the result. First, this additional weight is measured and then the display is reset to zero. The weight of this object is then disregarded at the next weighing.	Patient data input	Data such as gender, age and PAL (Physical Activity Level) can be entered via the input key on the multifunction touch display of the seca 285. Together with the height and weight measurements, the data are wirelessly transmitted to calculate the resting energy expenditure and total energy expenditure or percentiles for children and teenagers.
Pre-TARE function	When activated, a previously stored value is automatically deducted from the currently measured weight. For example, when caregiver and patient stand on the scales together and only the weight of the patient is to be shown.	CLEAR, Auto-CLEAR function	Old measurements or patient data can lead to incorrect calculations. Therefore, the CLEAR function deletes results from previously measured patients. It can be activated manually or automatically with Auto-CLEAR after five minutes.
BMIF	The amount of milk taken by a baby when being breastfed can be ascertained with the aid of the Breast-Milk-Intake function (BMIF). At the touch of a button, the weight of the baby determined before feeding is stored and then deducted from the weight determined after feeding (difference function).	Liwith value function	For effective monitoring of patients, one can preset a weight liwith and an alarm rings if this is exceeded.
Mother+child function	This function was developed to enable the weighing of children in the arms of their parents. When the mother+child function is activated, the previously stored weight of the adult is deducted from the currently determined value. The display then shows only the weight of the child, with an accuracy of down to 50 g.	Weighing range switch-over, auto weighing range switch-over	seca scales with a multi-range function let you quickly switch manually from one range to another. From a fine graduation at low capacity in scale range 1 to maximum capacity in scale range 2.
HOLD, Auto-HOLD	Once the weight has been saved with a press of the HOLD key, it remains in the display after the patient has left the scale. This function lets the doctor or nurse care for the patient first and then record the weight. When the Auto-HOLD function is activated, the HOLD function is automatically triggered as soon as the weight has stabilized.	Damping function	The damping function makes it possible to determine the precise weight in spite of disturbances during the weighing process, e.g. caused by the patient moving. The degree of damping can be adjusted as required before weighing a patient: the stronger the damping, the less sensitively the scales react to the movements during the weighing process.
BMI function	The Body Mass Index correlates height and weight to one another. A tolerance zone considered to be ideal from a health point of view is between 18.5 and 24.9. If the value is higher or lower, medical advice should be obtained.	RESET function	The RESET function restores the factory settings.
BFR	The Body Fat Rate compares the patient's percentage of fat with an ideal value. Body height and weight are the basis of calculation; extra consideration is given to gender.	SEND, Auto-SEND function	At the touch of a button, the measured and input data are sent to receiving devices such as a scale with the appropriate BMI function or a PC via radio. When the auto SEND function is set, the SEND function is prompted automatically with a stable weight value or a confirmed height reading.
		Confirm button	With the touch of a button, measured values can be transmitted directly into the electronic patient record (EMR) after identification of the patient and the user by barcode scanner. Manual transcription errors can therefore be avoided.
		Three-point height measurement	An accurate height measurement can only be obtained when a patient comes in contact with three points (shoulders, rear-end, and heels) together with a stadiometer. This ensures the patient is standing fully upright.

seca mBCA and seca mVSA:

mBCA	Medical Body Composition Analyzer: a device that provides a medically precise measurement of a person's body composition.	HYD	Hydration: the ratio of extracellular water to intracellular water.
BIA	Bioelectrical Impedance Analysis: a method of analyzing body composition. This involves measuring the resistance of the body and its parts to a weak alternating electrical current.	Impedance (Z), Phase angle (φ), Resistance (R), Reactance (Xc)	These represent the raw data from the Bioelectrical Impedance Analysis that can be used for medical studies. This includes the impedance, the phase angle and the two impedances, resistance and reactance.
FM	Fat Mass: the fat mass defines the amount of body fat in kg as an absolute mass and in % as the relative proportion of the body weight.	BMI	Body Mass Index: the unit of measurement for the analysis of body weight in relation to a person's height, calculated using the formula (weight in kg/ height in m) ² .
FFM	Fat-Free Mass: the total body weight minus the fat mass.	BIVA	Bioelectrical Impedance Vector Analysis: the way in which the BIVA is presented enables analysis of hydration and cell mass.
FMI	Fat Mass Index: this index measures the proportion of body fat based on the height, weight and fat mass.	BCC	Body Composition Chart: the Body Composition Chart developed by seca shows the measurement points of the fat mass index in a coordinate system and helps to determine body composition.
FFMI	Fat-Free Mass Index: this is a measurement of the muscle definition of a human body. The measurement is based on the body height, weight and fat-free mass.	EMR	Electronic Medical Record: these are information systems that are used in hospitals to record and present patient information.
SMM	Skeletal Muscle Mass: this includes all the muscles that are attached to the skeleton or – by extension – used to move the body.	HL7, GDT	These are recognized data formats needed by most EMR systems to process patient data.
TBW	Total Body Water: the sum of the fluids outside and inside the cells of the body, not including the substances dissolved therein.	mVSA	Medical Vital Signs Analyzer: A device that measures the vital parameters of blood pressure, SpO ₂ , pulse, temperature and, by means of a measuring mat, body composition (Bioelectrical Impedance Analysis).
ECW	Extracellular Water: all fluids found outside the cells in the human body.	SpO₂	Pulse oximetry is used to measure blood oxygen saturation and pulse rate. The non-invasive method employs a finger clip sensor.
ICW	Intracellular Water: all fluids found inside the cells in the human body.	NIBP	Non-invasive blood pressure measurement: the oscillatory measurement method measures blood pressure by means of a cuff placed around the upper arm or thigh.
REE	The amount of energy that the body needs per day of complete rest, at room temperature and with an empty stomach, in order to keep the bodily functions working.		
TEE	Total Energy Expenditure: the total energy expenditure consists of the resting energy expenditure and the energy expended for everything the body does (muscle work, mental work, other body exertions).		

The products in this catalog bearing the symbol CE 123 and / or CE 102 fulfill the applicable requirements of directive 93/42/EEC on medical devices or directive 2014/31/EU on non-automatic weighing instruments.

Scales bearing this symbol and products shown in this catalog bearing the CE 0102 sign comply with directive 2014/31/EU on non-automatic weighing instruments. seca scales with this symbol comply with the

stringent quality and technical requirements applicable to calibratable scales. Scales bearing this symbol fulfill the applicable requirements of directive 93/42/EEC on medical devices.

Scales with these symbols meet the stringent requirements of accuracy classes III or IIII. Calibration class III scales can be used for calibration-required measurements in medicine.

Products bearing this symbol fulfill the applicable requirements of the 93/42/EEC on medical devices.

The professionalism of seca is also officially recognized. The notified body for medical devices responsible for seca confirms with the certificate that seca consistently complies with the strict legal requirements as a manufacturer of medical devices. The quality assurance system at seca includes the areas of

Design and Development, Production, Sales and Service of medical scales, height measuring instruments, software and measurement systems for the assessment of health status and nutritional condition. seca is authorized to conduct the manufacturer's conformity assessment of medical scales.

We are anxious to preserve our natural resources. This is why we strive to save packaging material where practical. And what is left over can be conveniently disposed of locally via Germany's Dual System recycling programme.

OUR PRODUCTS AND ART

See the world through our eyes.

Push the boundaries, reinvent the world and never be satisfied. That's the way artists have thought since art began and the way we have thought since seca was founded. That was and is precisely why art has grown into an important source of inspiration over our 180 years of existence. It brings up new questions, leads to new perspectives, and expands horizons – for our products too. We would like to have you participate in this process. In 2009, for instance, media artist Christina Lissmann created an image portfolio for seca that shows our products in a limitless fantasy world. In the current seca art project the renowned photographic artists, Barbara Metz and Eve Racine, are dealing with balance in the body. Without it, the body falls ill – balance is recovered in the end with the aid of seca. The human body is illustrated in an abstract and mechanical yet also playful and lively way. Welcome to the inspiring, limitless world of art. Welcome to seca.
