## EM-2T-TR

### Electric Treatment Table with Trendelenburg

eMensa electric treatment table has two sections, where backrest has an adjustable positioning angle with the maximum of 70 degrees and Trendelenburg position up to 20 degrees. The height adjustment system is controlled with the help of an electric drive. The treatment table is designed with a central brake system, which includes an antistatic swivel castor. Metal frame is made of powder coated steel, which default colour is white. More colour options from RAL palette are available. The soft part is made of high quality polyurethane foam and chipboard where both of them are covered with an artificial medical leather. Customisation of the treatment table dimensions is available under a special request.

Each flower, which blossoms on this Earth, has a soul of vitality, beauty and brittleness. That soul blossoms in more bright colours when it is being nourished. When given a lot of attention, a flower reveals all the beauty of its spectacular inner world. Just like a flower, it is essential for a person to take care of its soul, because healthy soul is a healthy body. eMensa electric treatment table is designed for a versatile care of a patient and professional treatment process. Maneuverable bottom carrier and different positioning angles of the table allows the treatment process to be moved to a higher level. The table is easy to relocate and has a lot of possibilities to enhance its multifunctionality by choosing different additional accessories.

### Electric Positioning for Maximum Comfort

The height of the electric trendelenburg tables is easily controlled by the handset remote as well as the backrest section. It creates a smooth and soft motion. Electric system enables medical workers to create the highest comfort for the patient by setting any desired position of the table as electric drives are able to stop at any angle.

## HM-2T-TR

*Hydraulic Treatment Table with Trendelenburg*

hMensa hydraulic treatment table has two sections, where backrest has an adjustable positioning angle with the maximum of 70 degrees and Trendelenburg position up to 20 degrees. The height adjustment system is controlled with the help of hydraulic pump. The pedals of height adjustment are marked with different colour rubber coverings for different directions. The treatment table comes with a central brake system, which includes an antistatic castor. Metal frame is made of powder coated steel. Default frame colour is white, but other colour options from RAL palette are available. The soft part is made of high quality polyurethane foam and chipboard, covered with an artificial medical leather. Customisation of the treatment table dimensions is available under a special request.

It is incredible what a magic nature can create in this world. It can turn a lively moving water to a rigid but magnificent frost. Frost decorates each tree, leave or flower with mysteriousness and magical beauty. Looking for inspiration in nature and discovering it's infinite sources of wealth and health, a person receives a magical gift of health. **hMensa** hydraulic treatment table might become a necessity of each healthcare professional who wants to give the best supervision for it's patients. Maneuverable bottom carrier and different positioning angles of the table allows the treatment process to be moved to a higher level. The table is easy to relocate and has a lot of possibilities to enhance it's multifunctionality by choosing different additional accessories.

### Unique Lying Platform Adjustment System

Hydraulic trendelenburg tables has a lying platform that is controlled by gas springs system. Trendelenburg function and the backrest of the table are controlled by pressing release handles at both ends of the table. The handles are separated by colours - green for the backrest and red for Trendelenburg. The positions might be fixed at any angle which enables medical workers to choose a needed position precisely.

## EM-2M-TR

eMensa electric massage table has two sections, where backrest has an adjustable positioning angle with the maximum of 70 degrees and Trendelenburg position up to 20 degrees. The height adjustment system is controlled with the help of an electric drive. Massage table comes with a central brake system, which includes an antistatic castor. There is an ergonomic opening for face in the backrest section which might have an insert to close it. Metal table's frame is made of powder coated steel, which default colour is white. The soft part is made of high quality polyurethane foam and chipboard, covered with an artificial medical leather. Customisation of the massage table dimensions is available under a special request.

### Electric Massage Table with Trendelenburg

If you look for a symbol of light, peace and divinity in nature, you should go and find yourself a lily blossom. This stunning and beautiful flower is not that easy to find, but once it happens, the atmosphere fills up with light and peace. This divine creature can inspire a person for taking a better care of his own health. Because health is divine, too. Because who would we be without a healthy body? eMensa electric massage table is designed for healthcare professionals who can take the best care of their patients. Maneuverable bottom carrier and different positioning angles of the table allows the treatment process to be moved to a higher level. The table is easy to relocate and has a lot of possibilities to enhance it's multifunctionality by choosing different additional accessories.

### Ergonomic Decisions for More Comfort

All RUNIBEDA massage tables has an ergonomic opening for face which has a removable face pillow. The pillow adapts to each patient's face creating more comfort during the treatment process and helps to avoid face imprints. The face hole insert, which can help to flatten the table surface, is available by selecting additional features for your product.

## HM-2T-TR

### Hydraulic Massage Table with Trendelenburg

**hMensa** hydraulic massage table has two sections, where backrest has an adjustable positioning angle with the maximum of 70 degrees and Trendelenburg position up to 20 degrees. The table is equipped with a manual control system. Massage table comes with a central brake system, which includes an antistatic castor. There is an ergonomic opening for face in the backrest section which might have an insert to close it. Metal table's frame is made of powder coated steel, which default colour is white. The soft part is made of high quality polyurethane foam and chipboard, covered with an artificial medical leather. Customisation of the massage table dimensions is available under a special request.

|                       |              |                    |           |
|-----------------------|--------------|--------------------|-----------|
| Length:               | 2100 mm      | Trendelenburg:     | 0° / +20° |
| Width:                | 700 mm       | SWL:               | 220 kg    |
| Height:               | 500 - 900 mm | MPW:               | 195 kg    |
| Headrest Positioning: | 0° / +70°    | Paper Roll Holder: | Included  |

When it comes to symbolism, wheat has a meaning of wealth, fertility and life. It has always been a symbol of bread and wealthy nutrition in a physical state. But wheat fields can be a soul food, too. They always create lively and beautiful landscapes, which can make people want to run through them feeling wild and free and thus bringing wealth and health to their mind. **hMensa** hydraulic massage table is created to bring this gift of wealth for person's body. Maneuverable bottom carrier and different positioning angles of the table allows the treatment process to be moved to a higher level. There are a lot of possibilities to enhance table's functionality by choosing different additional accessories and thus to provide the highest quality help for human body.

### Set Any Position You Need

Hydraulic trendelenburg tables comes with gas spring adjustment system for backrest. This type of system enables healthcare workers to set any angle for the section as the locking mechanism of the gas spring can fix at any desired position. The operation handle of the backrest gas spring is clearly visible as it marked in green colour.

## Choose an Easier Daily Routine

All types of Trendelenburg tables comes with paper roll holder with shear edge to make healthcare workers daily routine easier.

The holder can be easily unmounted so it is optional - a customer might choose this feature depending on their needs.

A standard paper roll holder is also available on a special request.

R3.2

## Advantage of Trendelenburg

Trendelenburg tables are designed to provide a versatile and safe treatment process for the patient.

Trendelenburg position is included to prevent patient fainting as shock therapy helps to avoid this phenomenon.

There is a red handle located at the foot end of the table to operate Trendelenburg function. A smooth motion of the lying platform adjustment system allows healthcare workers to control the table with ease.

The angle of Trendelenburg is 0 / +20°.

R1.9

R1.10

### Design and Functionality

The bottom carrier with double swivel castors and central brake system is one more reason which allows to call Trendelenburg tables functional. It provides the possibility to relocate the table with ease and saves the spine of healthcare workers from injuries. The central brake system ensures that the castors are blocked safely while the table is in service and ensures an easy release of the castors as well. To make the product even more functional - directional castor comes with the table by default.

Design of the castors creates a modern and attractive image of the product and it is easy to adapt to any medical or healthcare institution environment.

### More Options for Your Choice

RUNIBEDA provides a possibility to choose what fits best for each customer. Trendelenburg tables has 3 different options for the castors - 125 mm and 150 mm single central brake castors and 150 mm double central brake castors which comes by default. All durable, all flexible, all functional.

125 mm

R1.7

150 mm

R1.8

### Easy Operation for Healthier Staff

Hydraulic Trendelenburg Tables comes with gas spring adjustment system for all moving sections of lying platform. The system includes release handles of different colours to make operation process smore clear. A smooth motion of the adjustment system allows healthcare workers to operate the product sections easier, using less power.

R2.2

### Highest Level of Safety

Safety of the patient and healthcare workers is one of the most important goals RUNIBEDA is always aware to reach. As the lying platform of Trendelenburg tables can move in a quite flexible way, folding stainless steel side rails were developed to mount on them as an additional feature. The side rails are durable and easily operated so the prevention of falling out will be ensured.

The side rails comes together with a DIN rail by default.

## Enhance the Quality of Your Product

Owning a functional and high quality tool is a desire of each healthcare professional. Now it is easier to make it real. Create a luxurious tool for the highest level healthcare. **RUNIBEDA** provides it's customers a possibility to enhance their product functionality by adding various additional features to the default version of the product. Heated lying platform is a functional and value enhancing feature for treatment tables as it creates more comfort and relaxation for the patient during the treatment period. It helps to relax the muscles as well as the state of mind which is vital for each person. When talking about the tehcnical side, the temperature of the heating system is easy to use as it might be controlled by a single control. The temperature range is 0° / 45°.

R4.3

R4.1

## Choose Durability and Flexibility

To reach a higher functionality level of the product, **RUNIBEDA** offers an electric footswitch additional feature for electric tables. It might be chosen instead of the handset remote nor in addition to it. It helps the medical specialists to keep their hands free from controlling the height of the table and to concentrate on the patient and the treatment process. It is a great choice to have both - handset and footswitch - and be able to use any tool at the exact moment.

## Functional and Mental Comfort

RUNIBEDA cares about its customers needs and always develops a lot of flexible solutions to reach a higher functionality level of their products. In this case, additional arm supports for treatment tables were included into the list of optional features.

R3.7

The arm supports comes together with a DIN rail feature to be mounted and fixed tightly on the table frame. Supports are intended for various treatment procedures such as blood collection, blood pressure measurement or others. It helps healthcare workers to create as comfortable environment for the patient as possible.

## Get a Versatile Tool

Massage tables with Trendelenburg has an ergonomic face opening on the backrest section. It comes with an additional face pillow to comfortably adapt each patient's head during the procedure. To create a more versatile product, an insert for face opening is available as an additional feature. It flattens the lying platform so there would be created an even surface if the patient must be lying on the back or using the product as treatment table. The face hole insert feature opens more possibilities to use the product. Take them!

R3.6

RUNIBEDA offers a solution for those who is looking for the product to suit their interior design. There are 12 different medical leather colours in the selection pallette that were inspired by nature. The metal frame comes in white colour by default but it might also be coated with any colour from RAL pallette. Additional colours are available by a special request. Starting with the features of the product, ending with the colours - create your personal product for professional use!
